

BRC Food

ISACert offers you a seamless BRC certification process

Quality and food safety are key for your company operating in the food industry. Purchasers of your products require you to offer guarantees of your company's commitment to quality and food safety. Are you able to provide these guarantees and are they accepted worldwide? Does an independent third party confirm this? Do your customers require you to prove that with certification against the BRC Food standard? Do you want your company to be audited by a well-reputed certification body with experienced auditors knowing your business?

Your customized solution

BRC Food has been developed to specify the food safety, quality and operational criteria required to be in place within a food manufacturing organization to fulfill obligations with regard to legal compliance and protection of the consumer.

The Standard is rigorous and detailed yet easy to understand. It takes a common sense, risk-based approach, and provides you with a clear step-by-step path towards certification.

ISACert is specialized in certification of food producing companies like yours. ISACert auditors are qualified to combine an audit for BRC Food with additional BRC modules like the ASDA module, or other standards like IFS Food.

Being in close contact with the standard owner BRC, we keep you updated about the latest information and interpretations of the standard so you will be fully prepared when an audit takes place.

Your result

- BRC Food certification will ensure your customers have confidence in your food safety program and supply chain management.
- What's more, by improving food safety, the Standard will also help you reduce waste, complaints, recalls and rejected products.
- You will have an in-depth assessment of your quality and food safety system by a BRC competent ISACert auditor.
- Your business will appear on the BRC Directory, giving you further recognition and creating more customer confidence.
- BRC Food is recognized by the GFSI (Global Food Safety Initiative), therefore meets the requirements specified by retailers insuring them an high level of consumer protection.
- You will have lower costs and less time required to complete supplier audits

Important to know

The BRC Global Standard for Food Safety, as well as the Interpretation Guideline, supporting publications and additional resources are quickly and easily available via BRC Participate, the BRC online subscription platform.

The BRC Food standard is only applicable for food processing companies. For logistics, food packaging producing companies and Agents and Brokers other specific BRC standards are available.

BRC has developed additional voluntary modules for traded goods and ASDA, which are audited in combination with BRC Food. Others are being developed. Please contact **ISACert** (info@isacert.com) for the latest information.

The BRC Food audit and certification is under the accreditation of ISACert BV from Zwolle in The Netherlands.

In what situation?

The BRC Food Safety Standard can be used by any food processing operation where open food is handled, processed or packed. This could be from primary products such as fresh produce pack houses and slaughterhouses through to processed foods, canneries and ready to eat products.

The BRC Food Safety Standard has been designed to help you establish good manufacturing practices so you'll produce safe, legal products that meet the quality levels expected by your customers.

Whether you should use BRC Food or another standard like IFS Food or FSSC22000 depends among others upon your customers' requirements.

Certification according to the BRC Food standard may be combined with another certification, such as IFS Food or FSSC22000. Furthermore, if you are supplying ASDA, ISACert can audit your organization to the ASDA module as well.
