

FSSC 22000 Packaging Materials

ISACert offers you a seamless FSSC 22000 Packaging Materials certification process

Your customer requires you to have a valid GFSI-recognised certificate. You want to meet this requirement, but no detailed specifications apply to the implementation of your food safety system? You have specifically designed your system according to your situation, and wish to prove that food safety of the packaging material you produce is competently safeguarded? You are looking for a certification body with sufficient expertise to accurately assess the effectiveness of your management measures and to confirm your choices and solutions.

Your customized solution

The FSSC 22000 Packaging Materials scheme has been especially developed for manufacturers of food packaging materials getting in direct or indirect contact with the food. The standard is a complete certification scheme for Food Safety Systems based on existing standards for certification (ISO 22000, ISO 22003 and technical specifications for sector PRPs).

Manufacturers of food packaging materials that are already certified against ISO 22000 will only need an additional review against technical specifications for sector PRPs to meet this certification scheme. Organizations that want to integrate quality in their management systems follow the requirements of ISO 9001.

ISACert is recognised and accredited to provide FSSC 22000 Packaging Materials certificates. Onze auditoren zijn ervaren professionals en worden speciaal geselecteerd zodat ze bekend zijn met de "best practices" in uw sector.

ISACert auditors are experienced professionals and are specially selected because they are thoroughly familiar with the "best practices" in your industry.

Your result

- An ISACert audit and certificate assure you that your system meets what your customers and the public expect from you – the production of safe food
- An FSSC 22000 Packaging Materials certificate indicates that your organizations food safety system is in conformance with the requirements that are given in this scheme and that your organization is able to maintain conformance with these requirements.
- By applying the FSSC 22000 Packaging Materials standard your company effectively manages risk and guarantees quality and safety of your products.
- Being certified is the best basis for further efforts to maintain your organizations food safety system and your organizations commitment to continuously improve its performance

Important to know

The certificate for FSSC 22000 Packaging Materials is issued for three years. The second and third year a surveillance audit is performed.

The FSSC 22000 Packaging Materials scheme documents are available for [download here](#).

The FSSC 22000 Packaging Materials audit and certification is under the accreditation of ISACert BV from Zwolle in The Netherlands.

In what situation?

The FSSC 22000 Packaging Materials standard is developed for the certification of food safety systems of organizations in the food chain that manufacture food-packaging materials getting in direct or indirect contact with the food.

FSSC 22000 Packaging Materials is especially beneficial for companies that are not subject to detailed specific requirements as under other GFSI-recognised certification standards. Also manufacturers having experience with ISO-certification can benefit a lot by choosing for FSSC 22000 Packaging Materials.

Whether you should use FSSC 22000 Packaging Materials or another standard like BRC IoP or IFS Pack Secure depends among others upon your customers' requirements.
